UNIVERSITY OF  
CALGARY

# A message from the conference director

On behalf of the Digital Technology and Healthy City Team at the University of Calgary, we invite you to join our community.

The Digital Technology and Healthy City (DTHC) conference unites a diverse array of disciplines—Biomedical Engineering, Geomatics Engineering, Civil Engineering, Medical Science, Kinesiology and Sport, and Computer Science—to collaboratively enhance the health of our cities. By combining cutting-edge research and innovative solutions from these fields, we aim to create urban environments that promote well-being and sustainability for all residents.

We welcome industry partners to participate in our annual conference. We are seeking companies that can sponsor the events as well as those interested in hiring our talented students.

Sayeh Bayat, Ph.D.
